

International Symposium

The Role of Pain in Bodily Defense and Autonomy

Date : 20-22Jan,2020

Venue : Center for Information and Neural Networks (CiNet)

How does the brain generate the conscious perception of pain, and how does this help protect our bodily integrity? This interdisciplinary workshop bringing together researchers to discuss pain, action, and movement. Talks will range from understanding the theoretical basis of defensive systems in autonomous control, understanding the function of action and pain in health, and applying these insights to understand chronic conditions such as arthritis.

Organising Committee

Ben Seymour
(Cambridge, CiNet/NICT)

Nobuhiro Hagura
(CiNet/NICT)

Takufumi Yanagisawa
(Osaka University)

Invited Speakers

Rebecca Slater (Oxford)

Sven Bestmann (UCL)

Victoria Chapman (Nottingham)

Gareth Hathway (Nottingham)

Markus Ploner (Munich)

Sang Wan Lee (KAIST)

Francesca Fardo (Aarhus)

Stella Koutsikou (Kent)

Abby Tabor (Bath)

Flavia Mancini (Cambridge)

Vicky Root (OXford, UCL)

Josh Johansen (RIKEN CBS)

Tatsuya Umeda (NCNP)

Masaya Hirashima (CiNet/NICT)

Tsuyoshi Ikegami (Columbia, CiNet/NICT)
